	Subject & Course No.		Descri	escriptive Title		Semester Credits		
F:	Calendar Descr	ription:						
	Human Anatomy and Physiology II is a continuation of the study of the anatomy and physiology of humans. The anatomy and physiology of the digestive, nervous, excretory, endocrine and reproductive systems are studied. Enrolment is usually limited to students in Sport Science programs.							
G:		<u> </u>	H:	Course Prerequisites:				
				D. 1 1100				
	mary Methods of Instructional Delivery and/or Learning Settings:			Biology 1109

M: Course Objectives / Learning Outcomes

Upon completion of Biology 1209, the student will be able to:

1. Describe the basic requirements of human nutrition and describe the roles of various nutrients in the body.

- 2. Describe the absorption, transport, storage and metabolic importance of carbohydrates, lipids and proteins.
- 3. Describe the gross anatomy of the digestive system and describe the digestion of carbohydrates, lipids, and proteins.
- 4. Describe energy metabolism, including the processes of glycolysis, Krebs Cycle and the electron transport chain.
- 5. Describe the importance of oxygen in respiration and compare aerobic and anaerobic respiration.
- 6. Describe the fluid and electrolyte composition of the body and explain how fluid and electrolyte balance is maintained.

7.

Q:	Means of Assessment						
	TYPE OF EVALUATION	POINTS					
	Class Tests and Assignments Laboratory Experiments and Activities (see Note 1 belocation - final Comprehensive Examinations - midterm - final	$ \begin{array}{c} 20 - 30 \% \\ (up \ to -20 \%) \\ 10 - 15 \% \\ 25 - 35 \% \\ 25 - 35 \% \end{array} $					
	TOTAL	100					
R:	Notes: 1. Laboratory Experiments and Activities: Laboratory work will be assigned each week. The laboratory work must be completed in the was assigned. If more than one lab assignment is not completed, two percentage points will be defor each lab assignment (in excess of the one permitted without penalty). Laboratory experiments and assignments are a compulsory component of this course. A minimum of 50% of the laboratory experiments and assignments must be completed to receive a P or better grade course. 2. Examinations: There will be one midterm and one final examination. The final examination will cover the encourse. If the student achieves a better grade on the final exam than on the midterm examination midterm grade will be raised to equal that achieved on the final examination. Prior Learning Assessment and Recognition: specify whether course is open for PLAR						
	There is no provision of PLAR, other than that normally done by examining transcripts and comparing course outlines of human biology courses taken within the last five years elsewhere to the Douglas College Biology 1209 course content.
