M4 Course Objectives/Learning Outcomes

• Introduce students to several theories used to interpret infant and toddler growth and development

• To introduce the concept of human development beginning in utero (prenatal development)

• To examine theories of fetal development and how they relate to growth and development from prenatal

development to the infant and toddler stages of life

• To examine the impact that prenatal conditions have on the development of the child

• To examine the birth process as it affects a child's growth and development

• To examine individual differences, including special needs, related to development of the child and

family

• To provide students with an understanding of the impact of the
