Student Directed Learning

I. Introduction

1. The Human and the Environment in Geography
2. Approaches to human-environment relationships
 - b) human agency
 - c) environmental perception
 - d) ecosystematic

II. How Nature Works

1. Natural cycles
2. Ecosystems
 - a) energy flows
 - b) food chains
 - c) niches
 - d) stability

III. Culture History

1. World population growth

2. Technological change

IV. Human Impact on the Physical World

1. Human impact on vegetation
 - a) fire
 - b) deforestation
 - c) desertification
2. Human influence on animal
 - a) domestication
 - b) dispersals
 - c) extinctions and expansions
3. Human impact on the soil
 - a) fertility
 - b) salinity
 - c) laterization
 - d) erosion

4. Human impact on
 - a)
 - b) deforestation
 - b) ground water
 - c) pollution

Rivers

- 1) dams
- 1) channelization

V. Human Impact on the Atmosphere

- a) carbon dioxide levels
- b) ozone change
- c) pollutants
- d) acid deposition

V. Conclusion

1. Environmental attitudes and action
2. Environmental legislation in Canada
3. Prospects.

Q. METHOD OF INSTRUCTION

The presentation of information will be by means of lectures, discussion groups, films, and slides. Field trips and field work will take place in class in the form of some map and lab work. Will also be included.

R. COURSE EVALUATION

The evaluation will be carried out in accordance with Douglas
