CURRICULUM GUIDELINES

- A. Division: **INSTRUCTIONAL** Effective Date: **JANUARY 2003**
- B. Department / **GEOGRAPHY**
Program Area: **FACULTY OF HUMANITIES**

M: Course Objectives / Learning Outcomes

At the conclusion of the course, a successful student will be able to:

1. Describe the morphology of the landscape and the major processes that form it in areas influenced by fluvial, glacial, periglacial, aeolian, coastal, and semi-arid systems.
2. Describe major scientific ideas and theories about the development of the landscape.
3. Critically analyse geomorphological issues in a scientific context at local, regional and global scales.
4. Use topographic maps, aerial photographs, and other quantitative techniques to analyse landforms and processes of land formation.
